

KEISER[®] m3

The Ride Of Your Life

The cycling revolution begins now—the result of over a decade of Keiser cycle development. What resulted was the creation of a crank system designed to meet the demands of indoor cycling. A hallmark of the Keiser M3 Indoor Cycle is its durability. Made of materials protected against corrosion with a resistance system that doesn't wear, making it virtually maintenance free; and requiring less work from your facility. All of this, plus the M3 is backed by a three year warranty, the longest in the industry. Experience the way cycling should be, the new Keiser M3.

Features

- Easy to Install
- Easy to Use
